5.PRODUCT USE

Mounting to the machines is possible with the bolt and nut assembly in the areas indicated in the adjacent image. The points to be taken into consideration during this installation are as follows: The electronic parts should not be contacted while assembling the product. In addition, if the product is not installed properly, vibrations that may occur will cause errors during measurement and control.

The product is powered by a 2M long cable fixed on it. We need to make the 24V DC+ connection from our cable line with a red stripe, and we need to make the GND connection from our single color cable line. When the supplies are connected in reverse, the product will not be damaged, but the product will not work. Cuts, breaks, etc. on the cable. If there is a problem, please contact us before using the product.
